

PARTNERING WITH

the
FUTURE is FEMALE

WHO WE ARE...

The Future is Female is a national movement dedicated to empowering women to speak up and address common health concerns ranging from pelvic pain and sexual dysfunction to enhanced recovery after surgery.

WHAT WE DO...

While modest strides have been made in women's health in recent decades, significant advancements and honest discussions pertaining to the health issues that uniquely impact women often fall short. *The Future is Female* believes women deserve access to innovative treatment options and the right to be active contributors in how they are cared for. Since its inception in 2021, the initiative has partnered with reputable women's organizations and subject matter experts to bring awareness and educational resources that drive discussions about "taboo" topics.

HOW WE CAN WORK TOGETHER...

The Future is Female is proud to work with organizations that share a passion for women's health and provide women with resources, education, and social support.

WE ARE OPEN TO ALL LEVELS OF PARTNERSHIP, INCLUDING BUT NOT LIMITED TO:
